Prompt for Antigravity

Copy and paste the text below into your chat with Antigravity:

Hey Antigravity! I need you to help me implement a new Privacy Policy for my blog to ensure I'm GDPR compliant.

Please complete the following tasks:

1. Create the Privacy Policy Page

- Create a new route/page at `/privacy`.
- Use the Markdown text provided at the bottom of this prompt as the content for the page.
- Please style the text nicely for readability. Use standard typography best practices (clear headings, bullet points, and good line spacing). If we are using Tailwind, please use the `prose` classes if they are configured.

2. Update the Global Footer

- Find my global footer component and add a small, subtle link to the `/privacy` page alongside any other existing links (like copyright info or social links).

3. Update the Contact Form

- Find the contact form component.
- Right below the "Submit" button, add this small disclaimer text: *"Your information is only used to reply to your inquiry. Read my full Privacy Policy."*
- Make sure the word "Privacy Policy" is a clickable link that routes to the new page.

Here is the content to use for the Privacy Policy page:

Privacy Policy

Last Updated: [Insert Today's Date]

Welcome to my personal blog. Your privacy is important to me, and I am committed to protecting your personal data. This policy explains what information I collect when you visit my website and use my contact form, and how I handle it.

1. Information I Collect

When you use the contact form on this website, I collect the following personal information that you voluntarily provide:

- Your Name
- Your Email Address
- The content of your message

2. How I Use Your Information

The information you provide through the contact form is used for one purpose only: **to read and respond to your inquiry.** I do not use your email address for marketing purposes, I do not have a newsletter, and I will never sell or share your personal information with third parties for their own commercial use.

3. Third-Party Services

To keep this website running securely, I use a few trusted third-party services that act as "Data Processors":

- **Formspace:** I use Formspace to securely process and route the messages you send via the contact form to my personal email inbox. You can review their privacy practices on their website.
- **Vercel:** This website is hosted on Vercel, which may collect basic, anonymized server logs (like browser type and timestamp) necessary for the security and operation of the site.

4. Data Retention

I only keep your contact form submissions for as long as necessary to resolve your inquiry. Periodically (every 3-6 months), I review and permanently delete old messages and their associated personal data.

5. Your Rights

Under the General Data Protection Regulation (GDPR), you have the right to:

- Ask what personal data I hold about you.
- Request that I correct any inaccurate data.
- Request that I permanently delete your messages and contact details.

If you would like to exercise any of these rights, please reach out to me using the contact form on this website.
