Summary

As a dedicated English Teacher with over 8 years of experience, I am deeply passionate about working with young learners and inspiring a lifelong love of learning. Throughout my career, particularly during my years dedicated to primary and kindergarten education in Vietnam, I have learned the vital importance of building warm, authentic relationships with students. I firmly believe that every child is unique and capable of success when given the right support.

My teaching philosophy prioritizes developing intrinsic motivation and essential life skills over simple memorization. By creating a brave, creative, and student-centered classroom environment, my goal is to foster curious, critically thinking individuals who are prepared for the future.

I am deeply interested in global events and educational innovations. To ensure I provide the most engaging and modern learning experiences, I am continuously learning—most recently by developing my technical problem-solving skills through Web Development studies. This reflects my broader belief that as educators, we must be eager to learn and grow every single day. I thrive in collaborative, dynamic communities where I can feel a deep sense of meaning in my work. I am actively seeking a primary school role where I can share my knowledge with children, grow alongside my colleagues, and meaningfully contribute to positive changes in Lithuanian education.

Experience

Sep 2022–Present — **English Teacher**, *INTELLECTUS mokykla*, Vilnius
- Taught English to a diverse range of students, from children to adults, across various proficiency levels.
- Created tailored lesson plans for group and individual classes, adapting methods to accommodate different learning preferences and ensure accessibility.
